

Apocalypse FAQ

This FAQ has two sections, each of which serves a different purpose.

The first section (GENERAL NOTES) explains new mechanics and concepts in the set. The second section (CARD-SPECIFIC NOTES) contains answers to most reasonable questions players might ask about a given card.

Items in the CARD-SPECIFIC NOTES section include full rules text for your reference. Not all cards in the set are listed.

GENERAL NOTES

Kicker

- * You can never pay a particular kicker cost more than once for a given spell.
- * You don't choose targets for the kicker part of a spell unless you intend to pay its kicker cost. You announce your intention to pay a kicker cost at the same time you would announce a spell's mode, which happens **before** you choose targets.
- * Once you've announced your intention to pay a kicker cost, you don't actually pay it until you pay the spell's mana cost.

Split cards

- * If you need to know a split card's characteristic (like its converted mana cost or color), you get two answers -- one for each half of the card. But if you need to know whether or not a split card **has** a certain characteristic (such as whether its converted mana cost is 5 or whether it's blue), you get a single yes or no answer based on the answers each half would give independently.

Volvers

- * Each of the five Volvers has two kicker costs. You may pay neither, one, or both of those costs, and the creature will come into play with the corresponding abilities and number of counters.
- * Here's a helpful hint: One of a Volver's kicker abilities puts one +1/+1 counter on it, and the other puts two counters on it. You can tell which kicker costs were paid by counting the number of +1/+1 counters on the Volver.
- * A note about cards with multiple kicker costs: On a double-kicker card like Degavolver, which costs 1W and has "Kicker 1B and/or R," the phrase "If you paid the 1B kicker cost" just means "If you paid the first kicker cost." Even if other effects modify the amount you actually paid for the first kicker ability, you still get the kicker effect.

Sanctuaries

* Each Sanctuary has an ability that triggers only if you control a permanent of one of the enchantment's enemy colors (for example, Dega Sanctuary is white and triggers only if you control a black or red permanent). If you don't control a permanent of the right color at the beginning of your upkeep, the ability never triggers in the first place; you can't change the color of a permanent you control during your upkeep to make a Sanctuary's ability trigger.

* A Sanctuary's effect is determined when its ability resolves.

* If you control a permanent of *one* of the enchantment's enemy colors when the ability triggers, and then you change the color of another permanent you control to the other enemy color before the ability resolves, you'll get the bigger effect.

* If you control a single permanent that's both of the enchantment's enemy colors, you'll get the bigger effect.

* If you control no permanents of the Sanctuary's enemy colors when the ability resolves, it will have no effect.

Disciples

* These are just like the *Invasion* set's Apprentices, but their abilities' activation costs require mana of the creature's enemy colors.

* The Disciples' abilities can target any creature, so they can target themselves.

"Envoys"

* Seven Apocalypse creatures, nicknamed "envoys," have "comes-into-play" triggered abilities that let you reveal the top four cards of your library and put all revealed cards of a particular creature type into your hand. (You put the other revealed cards on the bottom of your library in any order you choose.)

* The comes-into-play ability doesn't trigger until the creature actually comes into play. If the creature spell is countered, the ability never triggers.

* The envoys' comes-into-play abilities are not optional.

* If you have fewer than four cards in your library, simply fulfill the effect as much as possible with the remaining cards. (An effect that requires you to look at more cards than are in your library won't cause you to lose the game.)

Flagbearers

* The printed wording of the Flagbearers' static ability contains an error that would allow triggered abilities to sidestep the effect (because triggered abilities aren't "played" by any player). This wasn't intended, so the *Magic* rules team has issued a correction. It should read, "If a spell or ability an opponent controls could target a Flagbearer in play, that player chooses at least one Flagbearer as a target." Future _Oracle_ updates will reflect the correction.

* Let's say you want to play Terror on one of your opponent's creatures, but he or she controls a Standard Bearer. So you play the Terror targeting the Flagbearer, hoping to play Misdirection and change the target to the other, scarier creature. Can you? No, because if you change a target, you must choose a target, and the Flagbearer ability affects all instances of choosing targets.

* Creatures with the Flagbearer creature type have a static ability that makes your opponents target them if possible. The ability isn't actually part of the type, however, so if a creature's type is changed to Flagbearer when no creatures with the Flagbearer ability are in play, the creature with the changed type won't have any special ability -- no player will have to target it.

* If a spell has multiple targets, only one of the targets needs to be a Flagbearer. For example, if you control two Flagbearers and some other creatures when your opponent plays Reckless Spite ("Destroy two target nonblack creatures"), he or she must target one Flagbearer, but the other target can be any nonblack creature in play.

Whirlpool creatures

The Apocalypse set contains three blue creature cards that have a Winds of Change-like effect: Whirlpool Drake, Whirlpool Rider, and Whirlpool Warrior. Each has at least one ability that makes you shuffle your hand into your library and draw a new hand of as many cards as you had before. Notice that this ability isn't optional.

"Syphon" cards

The Apocalypse set contains three cards that let you draw cards in exchange for life: Phyrexian Arena, Phyrexian Gargantua, and Phyrexian Rager. Notice that the life loss and card draws aren't optional. You must lose life and draw cards when their abilities resolve, even if you are at 1 life or have no cards in your library.

CARD-SPECIFIC NOTES

Æther Mutation

3GU

Sorcery

Return target creature to its owner's hand. Put X 1/1 green Saproling creature tokens into play, where X is its converted mana cost.

* You don't put any tokens into play if Æther Mutation is countered because the target creature left play or became an illegal target before the spell resolved.

* Converted mana cost doesn't include kicker costs or any other additional costs.

Ana Sanctuary

2G

Enchantment

At the beginning of your upkeep, if you control a blue or black permanent, target creature gets +1/+1 until end of turn. If you control a blue permanent and a black permanent, that creature gets +5/+5 until end of turn instead.

* This ability gives a creature either +1/+1 or +5/+5, but never +6/+6.

* If your opponents control the only creatures in play that this ability can target, you must target one of those creatures.

* See "Sanctuaries" in the GENERAL NOTES section.

Anavolver

3G

Creature -- Volver

3/3

Kicker 1U and/or B

If you paid the 1U kicker cost, Anavolver comes into play with two +1/+1 counters on it and has flying.

If you paid the B kicker cost, Anavolver comes into play with a +1/+1 counter on it and has "Pay 3 life: Regenerate Anavolver."

* See "Volvers" in the GENERAL NOTES section.

Bloodfire Infusion

2R

Enchant Creature

Bloodfire Infusion can enchant only a creature you control.

R, Sacrifice enchanted creature: Bloodfire Infusion deals damage equal to the enchanted creature's power to each creature.

* Although the enchanted creature is sacrificed as part of the activation cost, Bloodfire Infusion deals the damage (and therefore is the source of the damage).

* If another player gains control of a creature enchanted with Bloodfire Infusion, the enchantment is put into its owner's graveyard.

Bog Gnarr

4G

Creature -- Beast

2/2

Whenever a player plays a black spell, Bog Gnarr gets +2/+2 until end of turn.

* Each black spell played by any player gives the Gnarr the bonus. So, if two black spells are played in the same turn, the Gnarr gets +4/+4. A spell is black if it has B in its mana cost.

Brass Herald

6

Artifact Creature -- Golem

2/2

As Brass Herald comes into play, choose a creature type.

When Brass Herald comes into play, reveal the top four cards of your library. Put all creature cards of the chosen type revealed this way into your hand and the rest on the bottom of your library.

Creatures of the chosen type get +1/+1.

* A creature type may be any one-word noun that doesn't have another meaning in the _Magic_(R) game. So you can't choose "Merfolk Goblin" or "Instant," but you can choose either Merfolk or Goblin.

* See "Envoys" in the GENERAL NOTES section.

Captain's Maneuver

XRW

Instant

The next X damage that would be dealt to target creature or player this turn is dealt to another target creature or player instead.

- * You must be able to choose two targets to play this spell.
 - * If the target to which the damage will be "redirected" is no longer in play when the damage would be dealt, the damage is dealt as if Captain's Maneuver had not been played.
-

Ceta Sanctuary

2U

Enchantment

At the beginning of your upkeep, if you control a red or green permanent, draw a card, then discard a card from your hand. If you control a red permanent and a green permanent, instead draw two cards, then discard a card from your hand.

- * This ability causes you to draw either one or two cards, but never three.
 - * See "Sanctuaries" in the GENERAL NOTES section.
-

Cetavolver

1U

Creature -- Volver

1/1

Kicker 1R and/or G

If you paid the 1R kicker cost, Cetavolver comes into play with two +1/+1 counters on it and has first strike.

If you paid the G kicker cost, Cetavolver comes into play with a +1/+1 counter on it and has trample.

- * See "Volvers" in the GENERAL NOTES section.
-

Coalition Flag

W

Enchant Creature

Coalition Flag can enchant only a creature you control.

Enchanted creature's type is Flagbearer.

If an opponent plays a spell or ability that could target a Flagbearer in play, that player chooses at least one Flagbearer as a target.

- * The enchanted creature is only a Flagbearer. The new type overwrites any existing types.
 - * If another player gains control of the enchanted creature, Coalition Flag is put into its owner's graveyard.
 - * See "Flagbearers" in the GENERAL NOTES section.
 - * If Coalition Flag enchants a creature that can't be the target of spells or abilities, nothing special happens. Because the enchanted creature can't be targeted, any other creature can be.
-

Coalition Honor Guard

3W

Creature -- Flagbearer

2/4

If an opponent plays a spell or ability that could target a Flagbearer in play, that player chooses at least one Flagbearer as a target.

- * See "Flagbearers" in the GENERAL NOTES section.

Consume Strength

1BG

Instant

Target creature gets +2/+2 until end of turn. Another target creature gets -2/-2 until end of turn.

* You must be able to choose two separate targets for this spell, but if one or the other becomes an illegal target before the spell resolves, it still affects the remaining one. Consume Strength is countered if both targets are illegal when the spell tries to resolve.

Dead Ringers

4B

Sorcery

Destroy two target nonblack creatures unless either one is a color the other isn't. They can't be regenerated.

* You can target any two nonblack creatures with this spell. Then, when the spell resolves, the creatures are destroyed only if they are the exact same colors. For example, if one of them is red and blue, the other must also be red and blue (and no other color). If the two target creatures' colors don't match exactly, the spell does nothing.

* Dead Ringers can destroy two colorless creatures.

Death Grasp

XWB

Sorcery

Death Grasp deals X damage to target creature or player. You gain X life.

* You don't gain any life if Death Grasp is countered because its target left play or became an illegal target before the spell resolved.

Death Mutation

6BG

Sorcery

Destroy target nonblack creature. It can't be regenerated. Put X 1/1 green Saproling creature tokens into play, where X is its converted mana cost.

* You don't put any tokens into play if Death Mutation is countered because the target creature left play or became an illegal target before the spell resolved.

* Converted mana cost doesn't include kicker costs or any other additional costs.

Dega Sanctuary

2W

Enchantment

At the beginning of your upkeep, if you control a black or red permanent, you gain 2 life. If you control a black permanent and a red permanent, you gain 4 life instead.

* You can gain 2 life or 4 life from this ability, but never 6.

* See "Sanctuaries" in the GENERAL NOTES section.

Degavolver

1W

Creature -- Volver

1/1

Kicker 1B and/or R

If you paid the 1B kicker cost, Degavolver comes into play with two +1/+1 counters on it and has "Pay 3 life: Regenerate Degavolver."

If you paid the R kicker cost, Degavolver comes into play with a +1/+1 counter on it and has first strike.

* See "Volvers" in the GENERAL NOTES section.

Desolation Angel

3BB

Creature -- Angel

5/4

Kicker WW

Flying

When Desolation Angel comes into play, destroy all lands you control. If you paid the kicker cost, destroy all lands instead.

* The Angel's comes-into-play ability will trigger regardless of *how* it came into play. That is, it will trigger when the Angel comes into play even if you didn't play the creature from your hand (and therefore couldn't pay the kicker cost).

Desolation Giant

2RR

Creature -- Giant

3/3

Kicker WW

When Desolation Giant comes into play, destroy all other creatures you control. If you paid the kicker cost, destroy all other creatures instead.

* The Giant's comes-into-play ability will trigger regardless of *how* it came into play. That is, it will trigger when the Giant comes into play even if you didn't play the creature from your hand (and therefore couldn't pay the kicker cost).

Dragon Arch

5

Artifact

2, T: Put a multicolored creature card from your hand into play.

* A "multicolored" card has more than one color of mana in its mana cost.

Dwarven Patrol

2R

Creature -- Dwarf

4/2

Dwarven Patrol doesn't untap during your untap step.

Whenever you play a nonred spell, untap Dwarven Patrol.

* A "nonred spell" has no red mana in its mana cost. This includes artifact spells, for example. Remember that lands aren't spells.

Emblazoned Golem

2

Artifact Creature -- Golem

1/2

Kicker X

Spend only colored mana on X. No more than one mana of each color may be spent this way.

If you paid the kicker cost, Emblazoned Golem comes into play with X +1/+1 counters on it.

* An effect that can reduce the play cost of an artifact creature spell can be used to reduce Emblazoned Golem's kicker cost. For example, if you control an Urza's Incubator (with Golem as the chosen type) when you play the Golem, you can spend, say, one blue mana on X and the Golem will come into play with three +1/+1 counters on it -- one counter for the blue mana and two more for the Incubator discount.

Enlistment Officer

3W

Creature -- Soldier

2/3

First strike

When Enlistment Officer comes into play, reveal the top four cards of your library. Put all Soldier cards revealed this way into your hand and the rest on the bottom of your library.

* See "Envoys" in the GENERAL NOTES section.

Evasive Action

1U

Instant

Counter target spell unless its controller pays 1 for each basic land type among lands you control.

* The number of basic lands you control is determined when Evasive Action resolves.

False Dawn

1W

Sorcery

Colored mana symbols on all permanents you control and on all cards you own that aren't in play become W until end of turn.

Draw a card.

* Because of obscure interactions with other cards, False Dawn has received errata. Its new wording is as follows:

Until end of turn, spells and abilities you control that would add colored mana to your mana pool add that much white mana instead. Until end of turn, you may spend white mana as though it were mana of any color.

Draw a card.

Notice that the new wording doesn't change the color of any card or permanent.

Fire / Ice

Instant / Instant

Fire deals 2 damage divided as you choose among any number of target creatures and/or players. / Tap target permanent. Draw a card.

* You don't get to draw a card if Ice is countered because the target permanent left play or became an illegal target before the spell resolved.

* See "Split cards" in the GENERAL NOTES section.

Gaea's Balance

3G

Sorcery

As an additional cost to play Gaea's Balance, sacrifice five lands.

Search your library for a land card of each basic land type and put them into play. Then shuffle your library.

* You don't have to find all the basic land cards you search for, so you can play Gaea's Balance even if you don't have a basic land card of each type in your library.

Glade Gnarr

5G

Creature -- Beast

4/4

Whenever a player plays a blue spell, Glade Gnarr gets +2/+2 until end of turn.

* Each blue spell played by any player gives the Gnarr the bonus. So, if two blue spells are played in the same turn, the Gnarr gets +4/+4. A spell is blue if it has U in its mana cost.

Goblin Ringleader

3R

Creature -- Goblin

2/2

Haste

When Goblin Ringleader comes into play, reveal the top four cards of your library. Put all Goblin cards revealed this way into your hand and the rest on the bottom of your library.

* See "Envoys" in the GENERAL NOTES section.

Goblin Trenches

1RW

Enchantment

2, Sacrifice a land: Put two 1/1 red and white Goblin Soldier creature tokens into play.

* The tokens this ability creates have one name and two creature types. Each token is named "Goblin Soldier" and has the types Goblin and Soldier.

Grave Defiler

3B

Creature -- Zombie

2/1

When Grave Defiler comes into play, reveal the top four cards of your library. Put all Zombie cards revealed this way into your hand and the rest on the bottom of your library.

1B: Regenerate Grave Defiler.

* See "Envoys" in the GENERAL NOTES section.

Guided Passage

URG

Sorcery

Reveal the cards in your library. An opponent chooses from among them a creature card, a land card, and a noncreature, nonland card. You put the chosen cards into your hand. Then shuffle your library.

* If your library doesn't contain a card of each specified type, the effect simply resolves as fully as possible. For example, if your library contains no creature cards, your opponent just chooses a land card and a noncreature, nonland card.

* Your opponent must choose a card of each type specified if able. The word "search" isn't used, so your opponent can't "fail to find" a particular type of card if one is in your library.

Ice Cave

3UU

Enchantment

Whenever a player plays a spell, any other player may pay that spell's mana cost. If a player does, counter the spell. # (Mana cost includes color.) #

* To counter a spell, a player must pay only the spell's mana cost. This doesn't include additions, subtractions, or modifications to the mana cost. A spell's mana cost is simply the amount and *color* of mana in its upper right corner.

Illusion / Reality

U / 2G

Instant / Instant

Target spell or permanent becomes the color of your choice until end of turn. / Destroy target artifact.

* Effects that change a card's color will overwrite all other colors the card had previously. If such effects last for a limited duration, the affected card will revert to its previous colors at the end of that duration (in this case, at the end of the turn).

* See "Split cards" in the GENERAL NOTES section.

Jaded Response

1U

Instant

Counter target spell if it shares a color with a creature you control.

* Jaded Response doesn't check to see if the target spell shares a color with a creature you control until it resolves. That means players can play spells and abilities in response that change either the spell's color or creatures' colors to affect Jaded Response's resolution.

Kavu Howler

4GG

Creature -- Kavu

4/5

When Kavu Howler comes into play, reveal the top four cards of your library. Put all Kavu cards revealed this way into your hand and the rest on the bottom of your library.

* See "Envoys" in the GENERAL NOTES section.

Last Stand

WUBRG

Sorcery

Target opponent loses 2 life for each swamp you control. Last Stand deals damage equal to the number of mountains you control to target creature. Put a 1/1 green Saproling creature token into play for each forest you control. You gain 2 life for each plains you control. Draw a card for each island you control, then discard that many cards from your hand.

* Notice that this spell targets an opponent and a creature. If you can't target both, you can't play Last Stand.

Life / Death

G / 1B

Sorcery / Sorcery

Until end of turn, all lands you control are 1/1 creatures that are still lands. / Return target creature card from your graveyard to play. You lose life equal to its converted mana cost.

* If you play Death and target a creature card with kicker costs or other additional costs, you can't choose to pay them, because you're simply putting the creature into play.

* Converted mana cost means the total value of the mana in the card's upper right corner. Additional costs aren't factored in.

* See "Split cards" in the GENERAL NOTES section.

Mind Extraction

2B

Sorcery

As an additional cost to play Mind Extraction, sacrifice a creature.

Target player reveals his or her hand and discards all cards of each of the sacrificed creature's colors from it.

* If a colorless creature is sacrificed, the target player still reveals his or her hand, but that player doesn't discard any cards.

* If you sacrifice a multicolored creature, the target player must discard all cards that are at least one of that creature's colors.

Minotaur Tactician

3R

Creature -- Minotaur

1/1

Haste

Minotaur Tactician gets +1/+1 as long as you control a white creature.

Minotaur Tactician gets +1/+1 as long as you control a blue creature.

* If you control a creature that's both blue and white, the Tactician will be 3/3.

* If you control more than one white creature (or more than one blue creature), the Tactician still gets only +1/+1.

Mystic Snake

1GUU

Creature -- Snake

2/2

You may play Mystic Snake any time you could play an instant.

When Mystic Snake comes into play, counter target spell.

* If no spells are on the stack when Mystic Snake comes into play, its comes-into-play ability does nothing. The Snake can't counter itself because it's no longer a spell after it has come into play.

Necra Sanctuary

2B

Enchantment

At the beginning of your upkeep, if you control a green or white permanent, target player loses 1 life.

If you control a green permanent and a white permanent, that player loses 3 life instead.

* This ability can make the target player lose 1 life or 3 life, but never 4.

* See "Sanctuaries" in the GENERAL NOTES section.

Necravolver

2B

Creature -- Volver

2/2

Kicker 1G and/or W

If you paid the 1G kicker cost, Necravolver comes into play with two +1/+1 counters on it and has trample.

If you paid the W kicker cost, Necravolver comes into play with a +1/+1 counter on it and has

"Whenever Necravolver deals damage, you gain that much life."

* See "Volvers" in the GENERAL NOTES section.

Night / Day

B / 2W

Instant / Instant

Target creature gets -1/-1 until end of turn. / Creatures target player controls get +1/+1 until end of turn.

* If you play Day, only creatures in play when it resolves get +1/+1. Creatures that come into play afterward don't get the bonus.

* See "Split cards" in the GENERAL NOTES section.

Order / Chaos

3W / 2R

Instant / Instant

Remove target attacking creature from the game. / Creatures can't block this turn.

* If you play Chaos, no creatures can block this turn, not even those creatures that come into play or become creatures after Chaos resolves.

* See "Split cards" in the GENERAL NOTES section.

Penumbra Bobcat

2G

Creature -- Cat

2/1

When Penumbra Bobcat is put into a graveyard from play, put a 2/1 black Cat creature token into play.

Penumbra Kavv

4G

Creature -- Kavv

3/3

When Penumbra Kavv is put into a graveyard from play, put a 3/3 black Kavv creature token into play.

Penumbra Wurm

5GG

Creature -- Wurm

6/6

Trample

When Penumbra Wurm is put into a graveyard from play, put a 6/6 black Wurm creature token with trample into play.

* The player who controls the Penumbra creature at the time it's destroyed puts the creature token into play. It doesn't matter which player owns the Penumbra creature card.

Planar Despair

3BB

Sorcery

All creatures get -1/-1 until end of turn for each basic land type among lands you control.

* The number of basic land types is determined when Planar Despair resolves.

Prophetic Bolt

3UR

Instant

Prophetic Bolt deals 4 damage to target creature or player. Look at the top four cards of your library. Put one of those cards into your hand and the rest on the bottom of your library.

* If you have fewer than four cards in your library, simply fulfill the effect as much as possible with the remaining cards. (An effect that requires you to look at more cards than are in your library won't cause you to lose the game.)

Putrid Warrior

WB

Creature -- Soldier Zombie

2/2

Whenever Putrid Warrior deals damage, choose one -- each player loses 1 life; or each player gains 1 life.

* Putrid Warrior's ability triggers whenever it deals damage, whether to a creature or player.

* Putrid Warrior's controller chooses the mode when its ability is put onto the stack.

Raka Sanctuary

2R

Enchantment

At the beginning of your upkeep, if you control a white or blue permanent, Raka Sanctuary deals 1 damage to target creature. If you control a white permanent and a blue permanent, Raka Sanctuary deals 3 damage to that creature instead.

* This ability can deal 1 damage or 3 damage, but never 4.

* If you control the only creatures this ability can target at the beginning of your upkeep, you must target one of those creatures.

* See "Sanctuaries" in the GENERAL NOTES section.

Rakavolver

2R

Creature -- Volver

2/2

Kicker 1W and/or U

If you paid the 1W kicker cost, Rakavolver comes into play with two +1/+1 counters on it and has "Whenever Rakavolver deals damage, you gain that much life."

If you paid the U kicker cost, Rakavolver comes into play with a +1/+1 counter on it and has flying.

* See "Volvers" in the GENERAL NOTES section.

Savage Gorilla

4G

Creature -- Ape

3/3

UB, T, Sacrifice Savage Gorilla: Target creature gets -3/-3 until end of turn. Draw a card.

* You don't get to draw a card if Savage Gorilla's ability is countered because the target creature left play or became an illegal target before the ability resolved.

Spiritmonger

3BG

Creature -- Beast

6/6

Whenever Spiritmonger deals damage to a creature, put a +1/+1 counter on Spiritmonger.

B: Regenerate Spiritmonger.

G: Spiritmonger becomes the color of your choice until end of turn.

* Effects that change a card's color will overwrite all other colors the card had previously. If such effects last for a limited duration, the affected card will revert to its previous colors at the end of that duration.

Standard Bearer

1W

Creature -- Flagbearer

1/1

If an opponent plays a spell or ability that could target a Flagbearer in play, that player chooses at least one Flagbearer as a target.

* See "Flagbearers" in the GENERAL NOTES section.

Suffocating Blast

1UUR

Instant

Counter target spell and Suffocating Blast deals 3 damage to target creature.

* You must be able to target both a spell on the stack and a creature to play this spell.

* If one of the targets is illegal when Suffocating Blast resolves, it still has its effect on the other. If both targets are illegal, Suffocating Blast is countered on resolution.

Sylvan Messenger

3G

Creature -- Elf

2/2

Trample

When Sylvan Messenger comes into play, reveal the top four cards of your library. Put all Elf cards revealed this way into your hand and the rest on the bottom of your library.

* See "Envoys" in the GENERAL NOTES section.

Tidal Courier

3U

Creature -- Merfolk

1/2

When Tidal Courier comes into play, reveal the top four cards of your library. Put all Merfolk cards revealed this way into your hand and the rest on the bottom of your library.

3U: Tidal Courier gains flying until end of turn.

* See "Envoys" in the GENERAL NOTES section.

Unnatural Selection

1U

Enchantment

1: Choose a creature type other than Wall. Target creature's type becomes that type until end of turn.

* This effect overwrites all other creature types. For example, if you play the ability on a Zombie Elf and choose Goblin, the creature will become a Goblin only, not a Zombie Elf Goblin.

* A creature type may be any one-word noun that doesn't have another meaning in the Magic game.

* If you play this ability on two creatures with the same name and choose to make both of them Legends, the one that became a Legend second will be put into its owner's graveyard (because of "the Legend rule").

* Remember that no abilities are built into the Flagbearer creature type. Making a creature into a Flagbearer won't give it the "chooses at least one Flagbearer" ability. (If a "real" Flagbearer is in play, its static ability will affect only its controller's opponents.)

Urborg Uprising

4B

Sorcery

Return up to two target creature cards from your graveyard to your hand.

Draw a card.

* You may choose zero, one, or two creature cards as targets for Urborg Uprising.

* You don't get to draw a card if Urborg Uprising is countered because none of the targeted cards are in your graveyard when the spell resolves.

Vodalian Mystic

1U

Creature -- Merfolk

1/1

T: Target instant or sorcery spell becomes the color of your choice.

* Effects that change a card's color will overwrite all other colors the card had previously.

* This ability can affect only actual instant and sorcery spells, not other types of spells that can be played "any time you could play" an instant or sorcery.

Wild Research

2R

Enchantment

1W: Search your library for an enchantment card and reveal that card. Put it into your hand, then discard a card at random from your hand. Then shuffle your library.

1U: Search your library for an instant card and reveal that card. Put it into your hand, then discard a card at random from your hand. Then shuffle your library.

* You can't play spells or abilities during the resolution of a spell or ability, so you can't search for an instant card and then play it before you randomly discard.
